

Rodrigo Mialichi Triboni

Product Manager · Control & Automation Engineering (UFU)

Uberlândia - MG, Brazil | +55 (17) 99663-0308 | rodrigotriboni@gmail.com | linkedin.com/in/rodrigotriboni1 | github.com/rodrigotriboni1 | rodrigotriboni.com

PROFILE

Control and Automation Engineering student at UFU, with hands-on experience in process automation, API integration, and digital product development. I currently work as an Associate Product Manager at AgRisk, combining technical insight with a user-first mindset to prioritize roadmaps, run discovery, and support data-driven decisions. I'm looking to keep growing my career in Product Management within tech.

PROFESSIONAL EXPERIENCE

Associate Product Manager · AgRisk — agtech for agribusiness credit & risk

02/2026 – Present

- Collaborate on defining and prioritizing the product roadmap in Jira and Notion, translating business needs and user feedback into functional requirements.
- Run product discovery — user interviews, data analysis, and process mapping — to identify improvement opportunities.
- Write user stories and acceptance criteria in Jira, together with engineering and design teams.
- Track product metrics across the roadmap to inform prioritization and data-driven decisions.
- Act as a bridge between business, operations, and technology.

Process & CRM Intern · AgRisk · Software

08/2025 – 02/2026

Internally promoted to Associate Product Manager

- Implemented and automated process workflows in HubSpot CRM, focused on mapping business processes.
- Integrated REST APIs and tested endpoints with Insomnia and Postman, supporting integration reliability.

Development Intern · Nougenic · Software

09/2022 – 09/2023

- Built user-centered mobile interfaces with Android Studio, Firebase, and TensorFlow, focused on process automation.
- Responsible for the Plantai and Avocai projects, handling data processing and end-to-end delivery.

EDUCATION

Universidade Federal de Uberlândia (MG)

07/2021 – 12/2026 (expected)

Control and Automation Engineering — In progress, full-time

ADDITIONAL COURSES

- Alura — Back End, ONE Tech Foundation G9 Program
- Ada — Git & Version Control
- freeCodeCamp — Foundational C# with Microsoft
- Samsung Ocean — Frontend Web with ReactJS
- WAGO — Programming Training, Codesys V3
- GRVA — Game Dev & VR/AR Applications with Unity 3D
- Complete Android Material Design Course
- English — Advanced
- UFU — Data Analytics for Business
- AWS Academy Graduate — Cloud Architecting

LEADERSHIP & EXTRACURRICULAR

Recovery Manager · EPTA — Aerospace Propulsion & Technology Team

01/2025 – 01/2026

Led the recovery team in developing safe-descent and reusability systems for experimental rockets, handling project management, testing, and solution integration. This work led to **1st place in the 500m solid-propellant category** at the Latin America Space Challenge (LASC) 2025, competing against 104 teams from 10 countries.

Recovery Team Member · EPTA — Aerospace Propulsion & Technology Team

10/2023 – 01/2025

Collaborated on developing and improving descent mechanisms, participating in tests and optimizations to ensure launch safety and efficiency.

Control & Automation Area · AICHe — American Institute of Chemical Engineers

09/2023 – 06/2025

Responsible for the electrical system of a chemically-powered vehicle (Chem-E-Car), including control and automation.

Projects Director · Electrical Engineering Student Board — UFU

04/2024 – 05/2025

Coordinated projects for the Electrical Engineering Student Board at UFU.

Marketing Director · Electrical Engineering Student Board — UFU

04/2023 – 04/2024

Responsible for communications and promotion of the Electrical Engineering Student Board's activities at UFU.

Instructor — PCB Manufacturing & Design · UFU

09/2024

Taught a workshop on PCB (printed circuit board) manufacturing and design for undergraduate students at UFU.
