Rodrigo Mialichi Triboni

Product + AI Builder · Control and Automation Engineering (UFU)

Uberlândia, MG, Brazil · (17) 99663-0308 · rodrigotriboni@gmail.com · linkedin.com/in/rodrigotriboni1 · rodrigotriboni.com

SUMMARY

Control and Automation Engineering student (UFU, expected graduation 12/2026) and Associate Product Manager at AgRisk. I build generative AI products end to end, agents with tool calling, RAG, MCP servers and multi-LLM gateways, in Python and TypeScript. I combine product vision with technical execution to turn business problems into products and automations that work.

AI AND DEVELOPMENT SKILLS

Agents and orchestration: prompt engineering, tool calling, structured outputs, RAG, MCP, LangChain, LangGraph, Google ADK, LlamaIndex, Vercel AI SDK.

Models and observability: LangSmith, Hugging Face, Gemma, OpenAI (GPT), Anthropic (Claude), OpenRouter, LiteLLM.

Vibe coding: Cursor, Claude Code, Codex and Manus.

Development: Python, FastAPI, TypeScript/Node, Next.js, React Native/Expo, PostgreSQL/Supabase, pgvector, REST APIs, Vercel, GitHub Actions.

AI PROJECTS (github.com/rodrigotriboni1)

agent-studio, open source builder for agents, RAG and workflows with governance: versioned manifest and per-tenant credential isolation. LangGraph, LlamaIndex, LiteLLM, MCP, pgvector, FastAPI.

LLM Bridge, multi-provider gateway (GPT, Claude, Kimi, DeepSeek), compatible with the OpenAI API, that switches providers automatically on failure. Built on LiteLLM.

Citrus Juice AI Backoffice, AI-powered SaaS for purchasing and suppliers, with approval levels and an audit trail of model decisions. Next.js, FastAPI, Supabase, Claude/OpenRouter.

SIRH Citrus and Clearstep, tool-calling agent (Vercel AI SDK + OpenAI) and a mobile app (Expo) with LLM feedback in JSON schema.

PROFESSIONAL EXPERIENCE

Associate Product Manager · AgRisk — 02/2026 – Present

- I define and prioritize the roadmap, run discovery (interviews, data analysis, process mapping) and write user stories with acceptance criteria alongside engineering and design.
- I build, with vibe coding, the MCP server for AgRisk's AgFlow CRM: it exposes the CRM to AI agents, so anything a user does in the platform can be done by their own agent.
- I track product metrics and connect business, operations and technology.

Processes and CRM Intern · AgRisk · promoted to Associate PM — 08/2025 – 02/2026

- I automated process pipelines and integrated REST APIs, validating endpoints with Insomnia and Postman.

Development Intern · Nougenic — 09/2022 – 09/2023

- I built mobile apps with Android Studio, Firebase and TensorFlow, and owned the Plantai and Avocai projects end to end.

EDUCATION

Control and Automation Engineering · Federal University of Uberlândia — 07/2021 – 12/2026 (expected)

- TCC: Bayesian Networks and Expected Utility for Next Best Action, combining a Bayesian network for risk estimation with an expected-utility layer to choose the best action in automated decision systems (case study on the public German Credit Data dataset, UCI).
- **Courses and certifications:** ONE Tech Foundation Back End (Alura, 2026), Git and Version Control (Ada), Foundational C# (freeCodeCamp), ReactJS (Samsung Ocean), Unity 3D VR/AR (GRVA), Codesys V3.5 (WAGO), Data Analytics for Business (UFU), AWS Academy Cloud Architecting, Android Material Design, Intermediate English.

LEADERSHIP AND ACADEMIC ACTIVITIES

Recovery Manager · EPTA, Propulsion and Aerospace Technology Team · team member since 10/2023 — 01/2025 – 01/2026

- I led the recovery team for experimental rockets (safe descent and reuse), from project management to testing and integration. 1st place in the 500m solid-propellant category at the Latin America Space Challenge (LASC) 2025, among 104 teams from 10 countries.
- **AIChE, Control and Automation (09/2023 – 06/2025):** responsible for the electrical system, control and automation of a chemically powered vehicle (Chem-E-Car).
- **Electrical Engineering Student Board (UFU):** Projects Director (04/2024 – 05/2025) and Marketing Director (04/2023 – 04/2024); taught a short course on PCB Manufacturing and Design (09/2024).
